

REMARKS

Claim 1 has been amended to call for establishing a wireless link, storing the information exchanged to establish that link, and using that stored information to reestablish the link.

Support for the amendment may be found at page 7, lines 21-25, of the application.

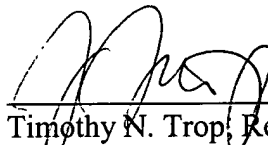

Law does not teach storing information exchanged to establish the link and using that stored information to reestablish the link. In other words, information exchanged to initially establish the link can be stored and used to more quickly establish the link again thereafter.

Law does not talk about reestablishing the link in a different way after establishing the link the first time. Nor does Law talk about reestablishing the link more quickly. The same may be said of Cannon.

Therefore, reconsideration is respectfully requested.

Respectfully submitted,

Date: February 24, 2006
